👤 Profile

U.S. Navy veteran with two years of hands-on infrastructure and device support at the Microsoft Innovation Hub through Wipro. Managed Hyper-V VMs, configured DNS/DHCP, made Cisco VLAN/port changes, and supported meeting-room systems. Experience includes daily readiness checks, ServiceNow/ICM escalation, device reimaging, vendor coordination, and shared troubleshooting documentation.

🔧 AI/Infrastructure Skills

Agent Orchestration

Multi-agent routing (plan / build / debug / review), unattended long-running sessions, subagent-driven delivery.

Model Operations

Cost-aware routing, provider pinning, local + cloud model ops via OpenRouter, OpenCode, AbacusAI.

AI Harness Agnostic

OpenCode, Grok Build, Cursor, Codex, Claude Code, Pi, Cline, Hermes Agent, Kilo Code.

Context & Tooling

MCP servers, session memory, code graphs, skill and policy authoring (AGENTS.md).

Product / Full-Stack

React Native/Expo, TypeScript, FastAPI, Postgres, Clerk, REST.

Ops / Cloud

Render, Docker, Sentry, PostHog, Upstash, Infisical, Tailscale.

📁 Professional Experience

07/2024 – 07/2026
Redmond, WA

Infrastructure and Experience Specialist

Wipro (Supporting the Microsoft Innovation Hub)

- Provided AV and virtual engagement support via Teams, including setup for briefings, workshops, and events.
- Managed VMs with Hyper-V in a Windows Server 2016, 2019, and 2022 environment; configured DNS and DHCP inside guest VMs through Server Manager.
- Supported Microsoft enterprise software (OS, Office, Teams Room) and third-party tools/drivers.
- Oversaw server room operations (physical space, access, power, cooling) and collaborated with internal/external teams for facility maintenance.
- Provided on-site smart hands support for Hyper-converged infrastructure, including rack/stack and cabling of Cisco and Arista switches and Dell PowerEdge devices under the direction of Microsoft network engineers.
- Owned technical management for onsite experience demos: configured, maintained, troubleshoot, and demonstrated to customers.
- Managed digital signage: provisioned, configured, supported hardware, and handled content management.

2013 – 2023
San Diego, CA |
Yokosuka, Japan |
Lemoore, CA |

Personnel Specialist

U.S. Navy

- Developed and implemented computerized database management systems to improve personnel tracking, resulting in increased efficiency and data accuracy.
- Performed queries, gathered data, and conducted qualitative and quantitative analyses of large, robust data sets to assess organizational activities and reporting.
- Maintained and entered info into Enlisted Service Records, gaining personnel to new commands, transferring personnel, preparing personnel for separation/retirement.
